Brainshark Presentations

Get information and ideas the easy way with Brainshark presentations from AIG Life Brokerage.

Brainshark is a library of presentations combining visual aids with audio. Covering a broad array of subjects, this training tool explains important information at the click of a button. Each presentation module will run 5 to 12 minutes. Some presentations will include important documents attached to a specific slide or under the attachment tab within a Brainshark Presentation. This enables you to open, look at and even print the document being discussed. Brainshark is easy to use. Just click on the topic you are interested in learning about and it will walk you through the presentation. Sit back, relax and learn.

To get Brainsharks to your agents: First view the presentation of your choice; then e-mail the presentation to yourself; then forward it to anyone on your e-mail list. It's that easy.
